

DATA SHEET

GLT Products' knitted wire mesh is an excellent material to act as an envelope for fabricating removable and reusable insulation blankets for thermal and acoustical insulation systems. It is flexible in either direction and able to conform to irregular surfaces. It is able to withstand stresses of repeated installations, vibration, buffeting, chafing, moisture and temperature extremes. Knitted wire mesh is excellent for marine, aerospace, industrial and commercial pad construction.

Physical Properties:

Knitted wire mesh comes in wire diameters of .006", .008", .0095" and .011". It is available in flattened tubes with widths of 6, 8, 10, 12, 18, 24, 30, 36, 38 and 42 inches. Tubes are then rolled and packaged for shipping in cardboard boxes. Mesh can also be supplied in either a flat or crimped (corrugated) form. Our crimped mesh yields will yield approximately 20% less coverage.

Construction Recommendations:

- .011 and .0095 wire diameters are recommended for maximum strength and temperature.
- .008 is ideal for intermediate applications requiring less frequent removal and for sewn applications.
- .006 is recommended for applications that require flexibility.

SPECIFICATIONS:

AMS-5647
 ASTM-A182
 ASTM-A276
 ASTM-A314
 ASTM-A479
 ASTM-A580
