

## MICRO-FLEX® LARGE DIAMETER PIPE & TANK FIBERGLASS WRAP

# DATA SHEET

## DESCRIPTION

Micro-Flex large-diameter pipe and tank wrap is a 2.5 pcf (40.1 kg/m 3) density product made from high-temperature, semi-rigid fiberglass blanket bonded to a flexible facing. Shipped in roll form, Micro-Flex's unique fiber orientation gives it increased compressive strength and permits close installation on round surfaces without reducing the thickness of insulation resulting in a loss of insulating efficiency. Both All Purpose (AP) and FSK facings are intended for indoor use. The ease of fit is particularly helpful on retrofit installations where existing insulation may result in nonstandard outside diameters.

#### **USES**

Micro-Flex large-diameter pipe and tank wrap is ideally suited for application on rounded shapes such as pipes, tanks, ducts, vessels and other similar round and irregular shapes. For applications requiring a vapor seal, all joints and facing penetrations must be sealed.

### **AVAILABLE TYPES AND SIZES OF ROLLS**

Micro-Flex is available in 3-foot (0.92 m) or 4-foot (1.22 m) wide rolls in either AP or FSK facings. For roll lengths, thicknesses and the amount of material per roll, please see List Price Schedule MFX-MI-1.

#### **ADVANTAGES**

**Easy to Apply.** For most applications, only a ruler, knife, 3- or 4-inch (76 mm or 102 mm) wide AP or FSK pressure-sensitive tape and stapler are required.

Flexible & Compression-resistant. The unique fiber manufacturing process results in interconnected glass fibers, creating a continuous insulation mat. There are no segments that are prone to delaminate and fall out during handling and fabrication.

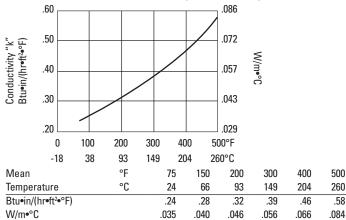

**Conforms Around Various Diameters and Shapes.** Due to the solid mass of fibers rather than cut-and-glued segments, even small diameter vessels can be wrapped without the worry of the "stop-sign effect."

**Low Thermal Conductivity.** The unique, uniform fiber orientation and a variety of thicknesses provide a dependable thermal conductivity ("k") of .24 Btu•in/(hr•ft² •°F) at 75°F mean temperature (.035 W/m•°C at 24°C).

**Superior Strength.** The unique fiber manufacturing process results in a highly durable product that exhibits excellent handling properties during shipping and installation.

Operating Temperature Limits: 0°F to 850°F (-18°C to 454°C)\*

#### THERMAL CONDUCTIVITY "K" (ASTM C 518)

**Shot-Free Glass Fibers.** Due to the advanced fiber-manufacturing process and latest advances in binder technology, Micro-Flex can stand up to the rigors of heavy vibration.

**Long Lasting.** The continuous fiber blanket remains intact compared to the 4-inch (102 mm) wide strips of conventional pipe and tank insulation, which tend to loosen or fall out over time when the adhesive dries out.

#### SPECIFICATION COMPLIANCE

ASTM C1393, Type IIIA, IIIB, Category 2, ASTM E 84, New York City MEA #360-03-E

#### **INSTALLATION**

When applying, simply determine the circumference of the piece being insulated (remember to add twice the thickness of insulation being used to the diameter). Add 2 to 4 inches (51 mm to 102 mm) for lap seam and cut to length. Remove 2 to 4 inches (51 mm to 102 mm) of glass to provide for the lap. Care should be taken to not cut through the facing. Lap seams should be stapled with outward-clinching staples placed on maximum 4-inch (102 mm) centers. For vapor retarder applications, the staples must be coated with a vapor retarder mastic for a complete vapor seal. All longitudinal and circumferential joints should be sealed with a 3- or 4-inch (76 mm or 102 mm) wide pressure-sensitive tape. For some applications, banding may be required for additional securement.

\*A sufficient thickness of properly installed insulation must be used to prevent insulation surface temperature from exceeding 150°F (66°C). A minimum 1½-inch (38 mm) thickness of insulation is required for operating temperatures above 350°F (177°C).

Note: For additional application or installation recommendations, please consult Johns Manville.

#### **PHYSICAL PROPERTIES**

Property	Value	<b>ASTM Test Method</b>
Maximum Use Temperature	850°F (454°C)	C 411
Density	2.5 pcf (40.1 kg/m <sup>3</sup> )	C 303
Compressive Resistance	25 psf (1,197 Pa)	C 165
Composite Surface	•	E 84
Burning Characteristics	25 or Less	
Flame Spread	50 or Less	
Smoke Developed	150°F (66°C)	C 1136
Facing Temperature Limit	0.02 Perms	E 96
Water Vapor Permeance		200

LARGE DIAMETER PIPE & TANK FIBERGLASS WRAP

# DATA SHEET

## MICRO-FLEX STRETCH-OUT CHART (I-P UNITS)

Approximate length in inches to cut rolls to fit large pipes and ducts.

Nominal	Pipe Outside	Thickness (in.)						
Pipe Size (in.*)	Diameter (in.*)	1	1½	2	<b>2</b> ½	3	3½	4
10	10 ¾	<b>40</b> 5⁄8	44 1⁄8	<b>47</b>	<b>50</b> 1⁄8	<b>53</b> 3⁄8	<b>56</b> ½	<b>59</b> 5⁄8
12	12 ¾	47	<b>50</b> ½	53 ¾	<b>56</b> ½	<b>59</b> 5⁄8	<b>62</b>	66
14	14	<b>50</b> %	53 ¾	<b>56</b> %	<b>59</b> 5⁄8	<b>62</b> 7⁄8	66	69 ¼
16	16	57 ¼	<b>60</b> 1⁄8	63 ¼	66	69 ¼	<b>72</b> 1⁄8	75 ¼
18	18	<b>63</b> 5⁄8	<b>66</b> ½	<b>69</b> 5⁄8	<b>72</b> 1⁄8	75 ¼	<b>78</b>	81 ½
20	20	70	<b>72</b> ½	<b>75</b> 5⁄/8	<b>78</b>	81 ½	84 ¾	<b>87</b> %
22	22	76	<b>78</b> ¾	82	84 ¾	<b>87</b> %	<b>91</b> 1⁄8	94 ¼
24	24	<b>82</b>	<b>85</b> ½	88 ¼	<b>91</b> 1⁄8	94¼	97 ¾	100 5⁄8
26	26	88 3⁄4	91 ½	<b>94</b> 5⁄8	<b>97</b>	100 5⁄8	103 ½	106 <sup>5</sup> ⁄8
28	28	95	97 ¾	101	103 ½	106 <del>5</del> ⁄8	109 ¾	113
30	30	101 3⁄8	103 7⁄8	107	109 ¾	113	116 1⁄8	119 ¼

\*These dimensions do not include a lap. You must ADD 2 to 4 inches for lap.

## EXAMPLE:

To use Micro-Flex large-diameter pipe and tank wrap instead of 20-inch x 2-inch (500 mm x 51 mm) pipe covering:

- 1. Cut piece 78<sup>3</sup>/8 inches (1991 mm) long (75<sup>3</sup>/8 inches [1915 mm] plus 3 inches [76 mm] for lap).
- 2. Strip off 3 inches (76 mm) of the fiberglass leaving the jacket intact.
- 3. Physically apply to the pipe the first section cut of any size to verify dimensional fit.
- 4. You now have a section that will cover a 3-foot (0.92 m) section of 20-inch (500 mm) pipe.
- In order to determine the length for pipe sizes not in the table:
- 1. Add twice the thickness of the insulation to the outside diameter of the pipe.
- 2. Multiply this value by 3.14.
- 3. Add 2 to 4 inches (51 mm to 102 mm) for a lap.
