

SEAL-CLEAN

(POLY FOAM CLEANER)

CLEANER 1-PART MULTI-PURPOSE FOAM CLEANER

Seal Clean is a multi-purpose cleaning agent used to dissolve uncured or fresh polyurethane foam and adhesive, formulated without the use of any ozone-depleting materials. Seal Clean is uniquely designed for cleaning of the one-component professional dispensing units, as well as for general cleaning purposes such as tools, work surfaces, etc.

APPLICATION AREAS

Typical application for Seal Clean would include cleaning of the one component dispensing unit to keep internal and external parts working efficiently. Seal Clean may also be used for dissolving uncured urethane foam and adhesives in most one-component applications.

PROPERTIES

WARNING: Contents are extremely flammable. Never use near open flame, sparks, heat sources, or other potential sources of ignition. The pre-pressurized cleaning agent dissolves uncured or fresh polyurethane foam and will evaporate quickly. Its unique design allows the user to dispense contents in the upright or inverted position for easy access and convenience of use with the one-component dispensing unit.

Seal Clean requires no outside mechanical or electrical power source. Recommended temperature for use is 75°F (24°C). It is available in one size, complete and ready for use. The product may be attached to one-component dispensing units for easy gun cleaning or used directly from the can for general cleaning purposes using the red spray activator.

PREPARATION FOR USE

Shake well before using. For general cleaning purposes, insert the red spray activator onto the valve stem of the can. With arrow towards the surface to be cleaned, slowly depress the red activator to spray cleaning agent. In case of delicate surfaces or fabrics, test a concealed area for evaluation. Wipe off excess residue or rub fabrics if necessary.

APPLICATION / USE

Dispensing unit cleaner: Follow the general cleaning instructions after every can to remove any fresh foam from dispensing unit adapter and barrel opening before attaching new container. It is not necessary to flush the dispensing unit after every can. Always replace the empty product container immediately with a fresh can. To maintain the dispensing unit in good working order, follow these instructions after every 10-20 cans, or prior to repair. While holding red spray activator aside, screw Seal Clean onto dispensing unit adapter until it will not go further. Do not over tighten. Carefully pull the trigger and dispense cleaning agent into suitable container. If necessary, repeat procedure two to three times until only clear cleaning agent appears from barrel.

IMPORTANT NOTE:

Cured foam cannot be dissolved with Seal Clean. Do not use pointed or sharp objects for cleaning of dispensing units. Use only in well ventilated areas. Wear impervious gloves, eye protection, and protect clothing when using. Read all instructions and safety information (MSDS) prior to use of any product. **KEEP OUT OF REACH OF CHILDREN.**

PRODUCT STORAGE

Store in cool, dry area. Do not expose to open flame or temperatures above 120°F (49°C) to avoid excessive pressure build up. Seal Clean is reusable by following product instructions.

SPECIAL HANDLING

Contents are extremely flammable. Never use near open flame, sparks, heat source, or other potential sources of ignition. Vapors may cause flash fire if ignited. Contents are under pressure. Do not puncture or incinerate. Do not place in hot water or near radiators, stove, or other sources of heat or store or above 129°F (49°C).
